Jakarta, Indonesia | +62-858-7756-9997 | valeryevantq@gmail.com | linkedin.com/in/evantvalery

PROFILE

Front-End Engineer with 2 years of experience specializing in building highly interactive and performant web applications and enterprise dashboards. Expertise in the modern JavaScript ecosystem, including React.js, Next.js, and TypeScript, with a strong focus on responsive UI implementation using Tailwind CSS and Material UI. A collaborative team player with a strong drive for continuous learning and delivering efficient, scalable technical solutions..

EDUCATION

Universitas Katolik Soegijapranata - Semarang

Bachelor of Computer Science

Aug 2021 – Dec 2024

- Informatics Engineering – GPA 3.94/4.00

WORK EXPERIENCE

PT Bank Sinarmas – Jakarta, Indonesia

Frontend Engineer (Contract)

Oct 2025 – Present

- **Loan Management System (LMS) Development:** Built and refactored core user interfaces for post-approval debtor management. Developed critical pages within the Collection module, as well as the Write-Off (WO) and Foreclosed Assets (AYDA) modules to handle defaulting loan processes.
- **Loan Acquisition & Management Origination System (LAMOS) Development:** Developed the Role Management interface and the Credit Decision Engine (CDE) eligibility assessment pages for prospective debtors. Collaborated on the credit application feature by building specific UI components.
- **System Integration & Code Quality:** Actively maintained repository stability by resolving complex Merge Request (MR) conflicts and executing cross-module bug fixes. Provided dedicated developer support during System Integration Testing (SIT) to ensure seamless and bug-free feature deployments.

PT Mitra Kasih Perkasa – Semarang, Indonesia

Junior Software Engineer

Jul 2024 – Oct 2025

- **Engineered Web Payment Solutions:** Developed multiple self-service payment applications (Retribusi Pintar, PDAM Takalar, Telkom University) featuring QR code scanning, transaction history filtering, and secure API integrations for payment processing.
- **Dashboard Feature Expansion:** Developed user interfaces and expanded functionalities for internal platforms, including the MINT Partner module, by implementing complex CRUD operations and integrating APIs for partner data management.
- **System Modernization:** Continued the migration and optimization of the legacy Billing Management System and UDBM dashboards, improving UI/UX performance while simultaneously maintaining the legacy codebase to ensure zero downtime.

Front-End Developer Intern

Jan 2024 - Jul 2024

- **Legacy-to-Modern Migration:** Spearheaded the replacement of the legacy Billing Management System dashboard by building a modern interface from scratch using React, Tailwind CSS, and Material UI.
- **Modular UI Development:** Developed specific, reusable front-end modules for the UDBM dashboard, providing scalable components that were successfully implemented and integrated by cross-functional engineering teams.
- **Bug Resolution:** Actively tracked, debugged, and resolved UI inconsistencies across the Apps2Pay internal dashboard.

Skills

Languages: Indonesian (Native), English (Fluent)
